

February 1992

Saylor Building Company
189 East Big Beaver
Troy, Michigan 48083

To Whom It May Concern,

Our Family had a home built by the Saylor Bldg. Co. in 1991. The home is located at 5323 Crowfoot in the Long Lake Meadows Subdivision north of Long Lake and East of John R in Troy.

Starting with our first contact with these fine people in February of 1991, through to the completion and closing of the home in September, we were completely satisfied and delighted with the way in which they handled everything.

We found both Jack and Joe Saylor to be very enthusiastic and flexible in helping us custom design the home to our wishes. Their years of building beautiful, quality homes was evident in the finished product.

The Saylor Bldg. Co. incorporated many features into the design of the home that not only increased the functionality of it but also added to the aesthetics. They were always willing to consider changes in the plan and often offered suggestions that improved on our own ideas.

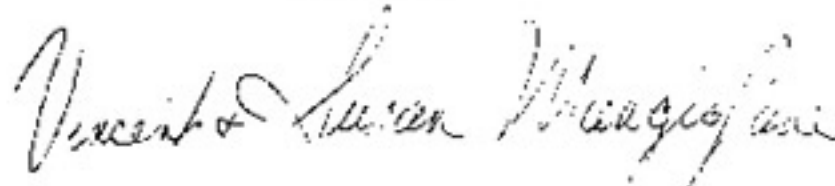

All the craftsmen that Saylor uses in the construction of their homes are highly skilled and efficient. Also, much of the standard materials that they use are of a better quality than we've experienced with other builders.

I must add that Mr. Jack Saylor was extremely fair and adaptable in working out the financial arrangements with us.

The minor follow-up details that always succeed the building of any new home have been dealt with in a prompt and efficient manner.

We are extremely pleased with our lovely, comfortable home and would highly recommend the Saylor Building Co. to anyone interested in building a new home.

Sincerely,

Vincent & Susan Mangiapane
5323 Crowfoot
